TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

1. First launch: read the access notice

Open TodayWeather. The notice 선택 접근 권한 (Optional permissions) explains why the app may use storage (backing up favorites), location (finding your position) and phone access (avoiding unsuitable ads). Tap 확인 (OK). Android asks for each permission itself when the app needs it.

The access notice over the start screen (O01).

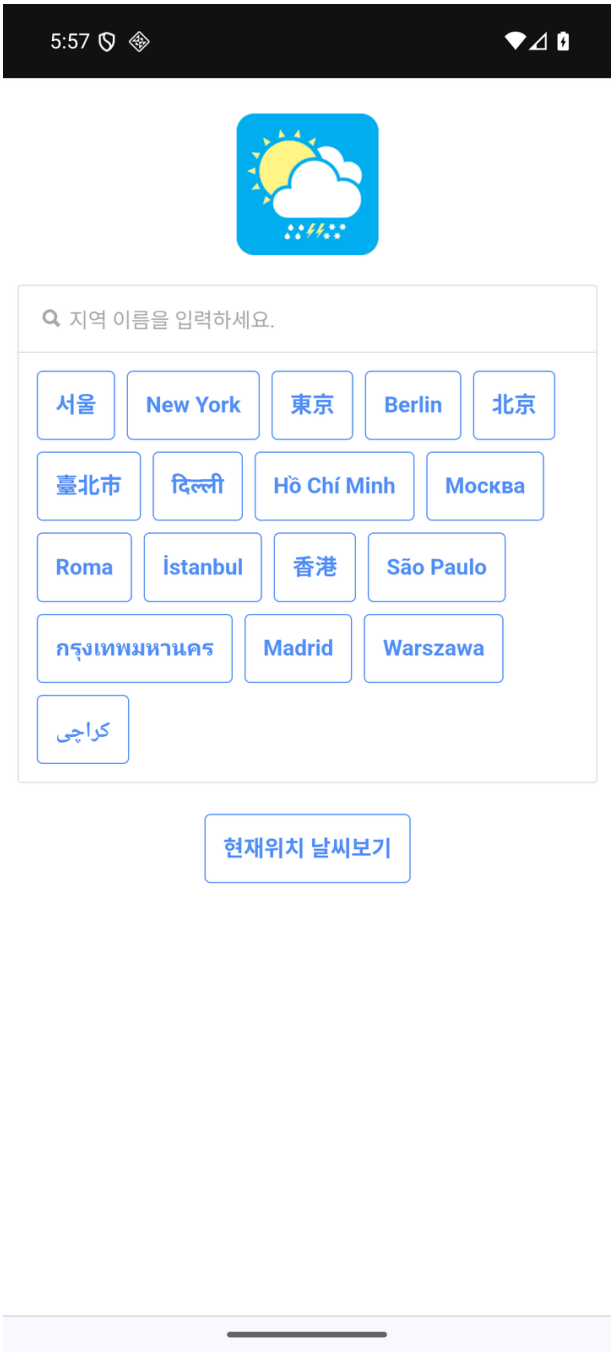

Expected result: The notice closes and the start screen remains.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

2. Choose a place

Tap 현재위치 날씨보기 (Weather at my location) to use your position, or type a place name in 지역 이름을 입력하세요 (Enter a place name). The buttons are shortcuts to major cities.

Start screen with the search box, city shortcuts and the current-location button (S01).

Expected result: The weather of the chosen place opens. If you deny location access, search for a place instead.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

3. Read today against yesterday

The 시간별날씨 (Hourly) tab shows the current temperature and sky. The next line compares with yesterday: 어제보다 -1°, 맑음 means 1° lower than yesterday, clear sky. The line below it summarizes air quality.

Hourly weather for 서울 (Seoul). This debug build shows a Google test ad below the tabs (S03).

Expected result: You can tell whether it is warmer or colder than yesterday.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

4. Read the hourly chart

In the chart, the blue line 당일 기온 is the temperature of each day and the grey line 전일 기온 the temperature 24 hours earlier, in three-hour steps. The red dot is the current temperature, and the chart opens at the current hour. Each column shows the sky and the chance of rain. Tap the small arrow under the chart to show wind and other details.

The chart with details open: wind speeds appear under the chart (S03).

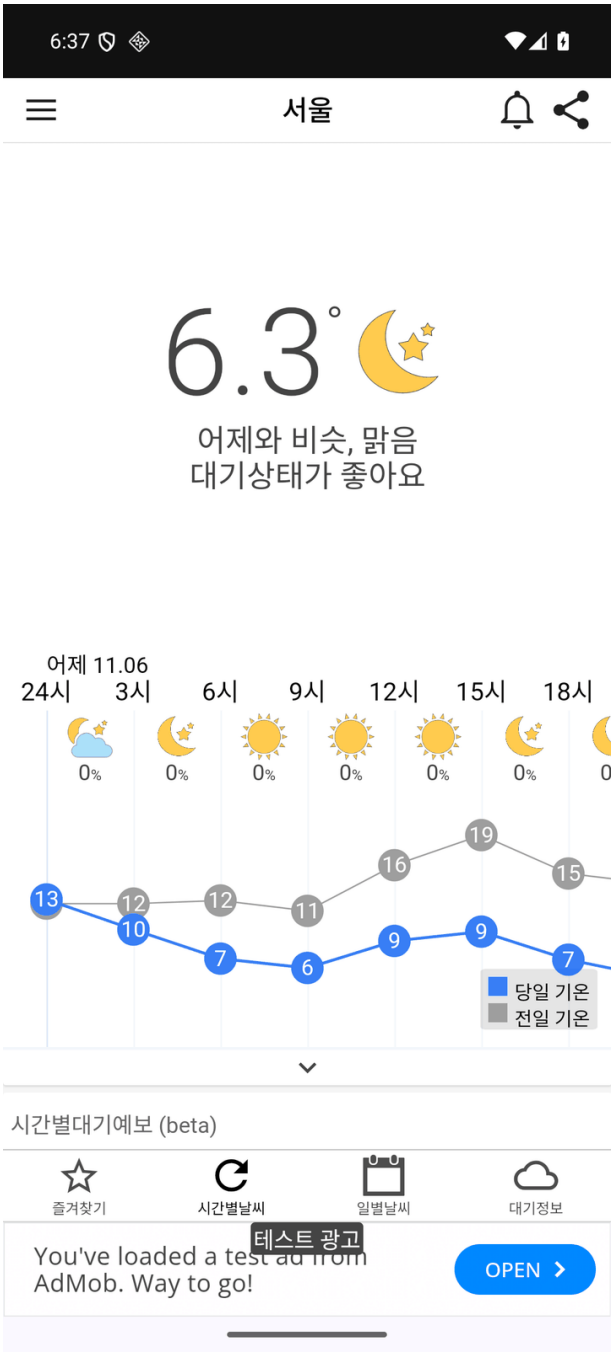

Expected result: The details appear below the chart; tap the arrow again to hide them.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

5. Hourly chart: the earliest hours

Drag the chart to the right as far as it goes. It starts at midnight at the beginning of yesterday: the label 어제 11.06 (Yesterday, 6 Nov) stands over 24시. On yesterday's columns the blue line is yesterday's temperature and the grey line the day before.

Left end of the hourly chart, captured at 18:37 on 7 November (S03).

Expected result: You can compare yesterday with the day before, three hours per column.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

6. Hourly chart: the latest hours

Drag the chart to the left as far as it goes. It ends at 24시 (midnight) at the end of the day after tomorrow. Later days appear only in 일별날씨 (Daily).

Right end of the hourly chart: the last column is 24시 on 9 November (S03).

Expected result: In this capture the chart covered four days, from the start of yesterday to the end of the day after tomorrow.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

7. Check the coming days

Tap 일별날씨 (Daily). Each column is a day: morning and afternoon sky, rain or snow amount and chance, and a bar from the lowest to the highest temperature. The red dot marks the current temperature on today's bar. When the tab opens, today is the third column.

Daily weather from Thursday 5 to Wednesday 11 November (S04).

Expected result: You can compare past and coming days. Tapping the selected tab again refreshes the data.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

8. Daily chart: past days

Drag the chart to the right as far as it goes. It starts seven days ago, here 토 31 (Saturday, 31 October). Past days show their sky, rain or snow amount and temperature range.

Left end of the daily chart (S04).

Expected result: You can look back one week.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

9. Daily chart: coming days

Drag the chart to the left as far as it goes. It ends ten days ahead, here 화 17 (Tuesday, 17 November).

Right end of the daily chart (S04).

Expected result: In this capture the chart covered 18 days, from seven days ago to ten days ahead.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

10. Check air quality

Tap 대기정보 (Air). The top shows the air grade (좋음 Good, 보통 Moderate, 나쁨 Bad, 매우나쁨 Very bad) with advice for outdoor activity. The colored scale marks the current index, and 시간별대기예보 (beta) shows the hourly air forecast.

Air quality for Seoul: grade 좋음 with index 48 on the scale (S05).

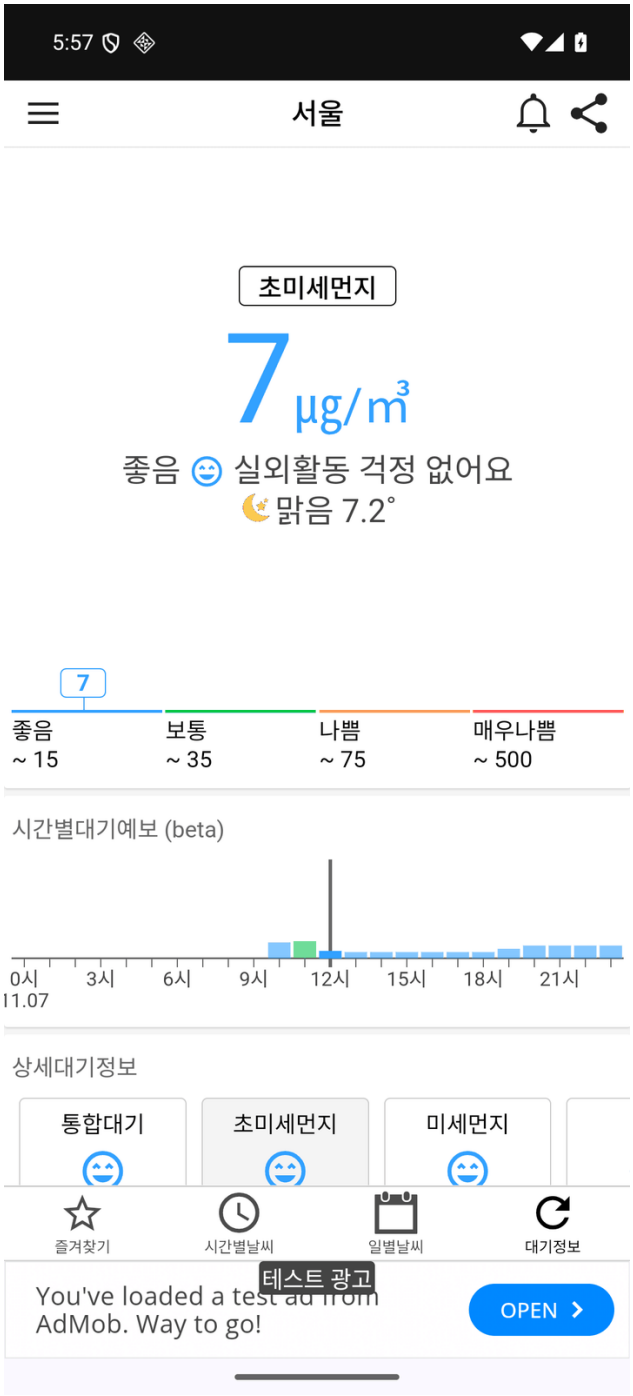

Expected result: You see the grade and the advice. If no air data exists for the place, only the grade scale appears, without a value, chart or station.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

11. Switch the pollutant

Scroll down to 상세대기정보 (Air details) and tap a card such as 초미세먼지 (PM2.5) or 미세먼지 (PM10).

초미세먼지 (PM2.5) selected: 7 μg/m³, grade 좋음 (S05).

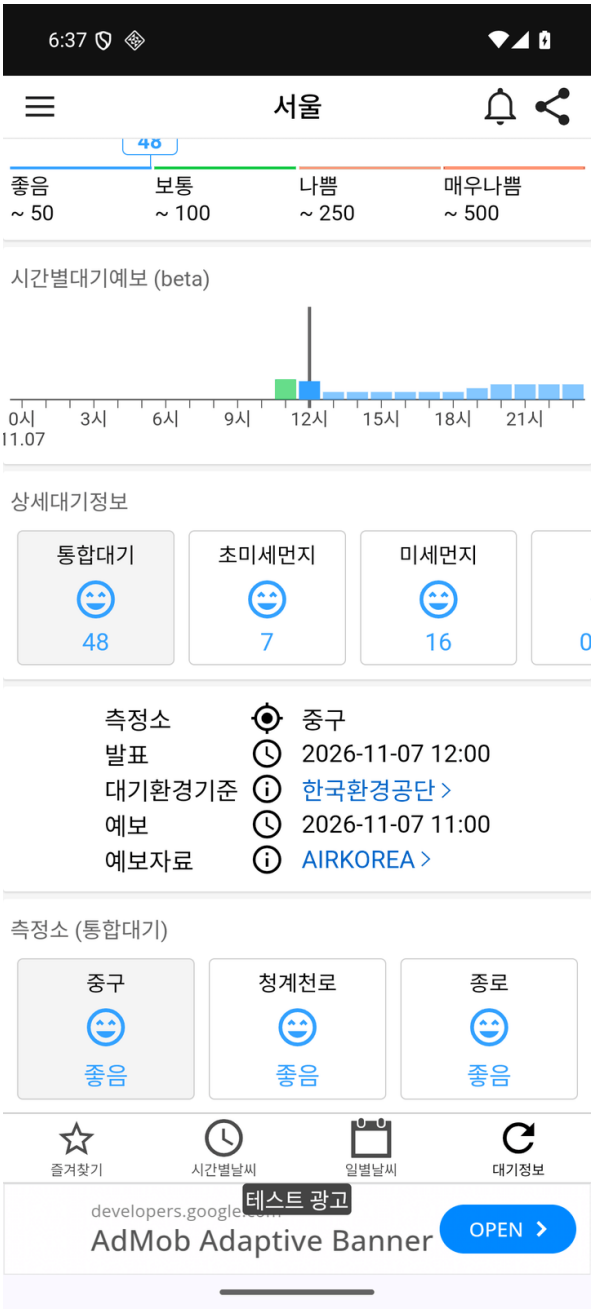

Expected result: The value, unit, scale and forecast change to the selected pollutant.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

12. See the measuring station

Scroll further down. 측정소 (Station) names the station whose values you see, here 중구, with the published (발표) and forecast (예보) times, the standard (대기환경기준) and the forecast source (예보자료). The 측정소 cards below list nearby stations for the selected pollutant; tap one to show its values.

Station 중구 and nearby stations for 통합대기 (S05).

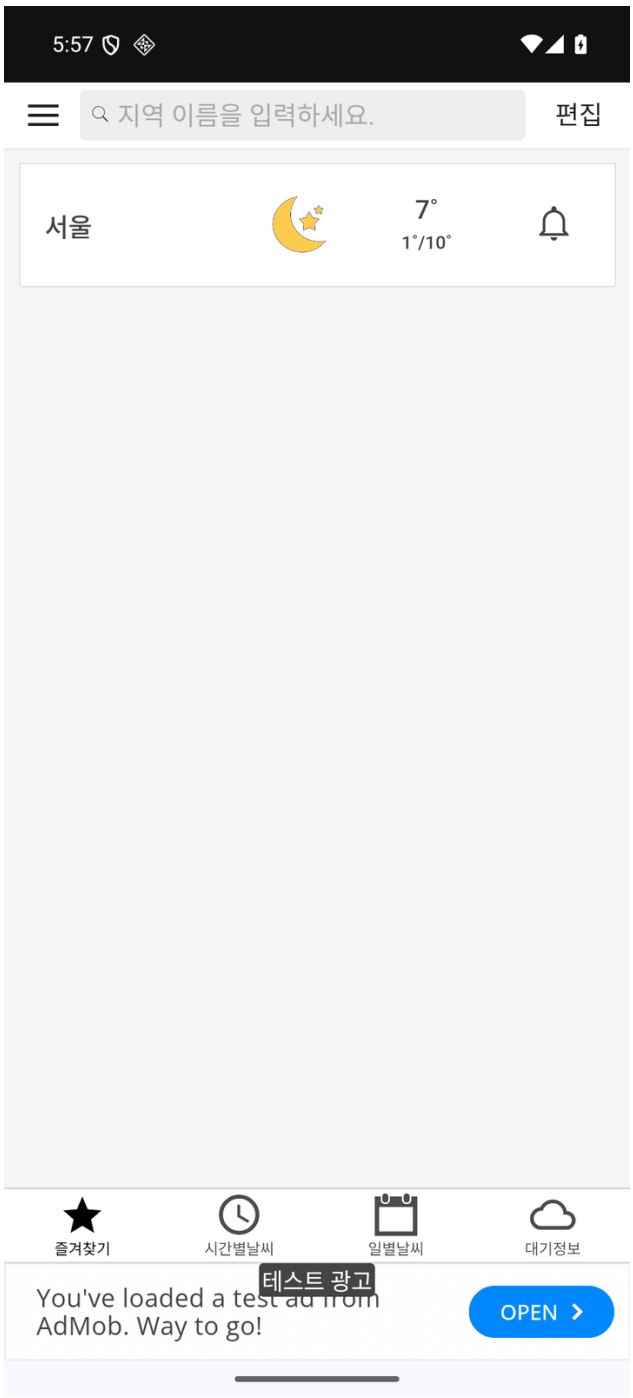

Expected result: The values at the top change to the chosen station.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

13. Open your saved places

Tap 즐겨찾기 (Favorites). Each row shows a place with its current temperature and the day's lowest and highest. The bell opens notifications for that place.

Favorites with one saved place (S02).

Expected result: Tapping a row opens that place's weather.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

14. Search and add a place

Type a place name in the search box, for example 부산 (Busan), and tap a result.

Results for 부산. 현재위치로 지역찾기 (Find by current location) is at the top (S02).

Expected result: The place is added to Favorites and its weather opens.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

15. See the new place

The added place opens in 시간별날씨. The arrows at the left and right edges show that more places are saved.

Weather for 부산광역시 (Busan) after adding it (S03).

Expected result: The title shows the new place.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

16. Move between places

Swipe left or right outside the chart, or tap the edge arrows, to switch to another saved place.

Swiping back to 서울 (S03).

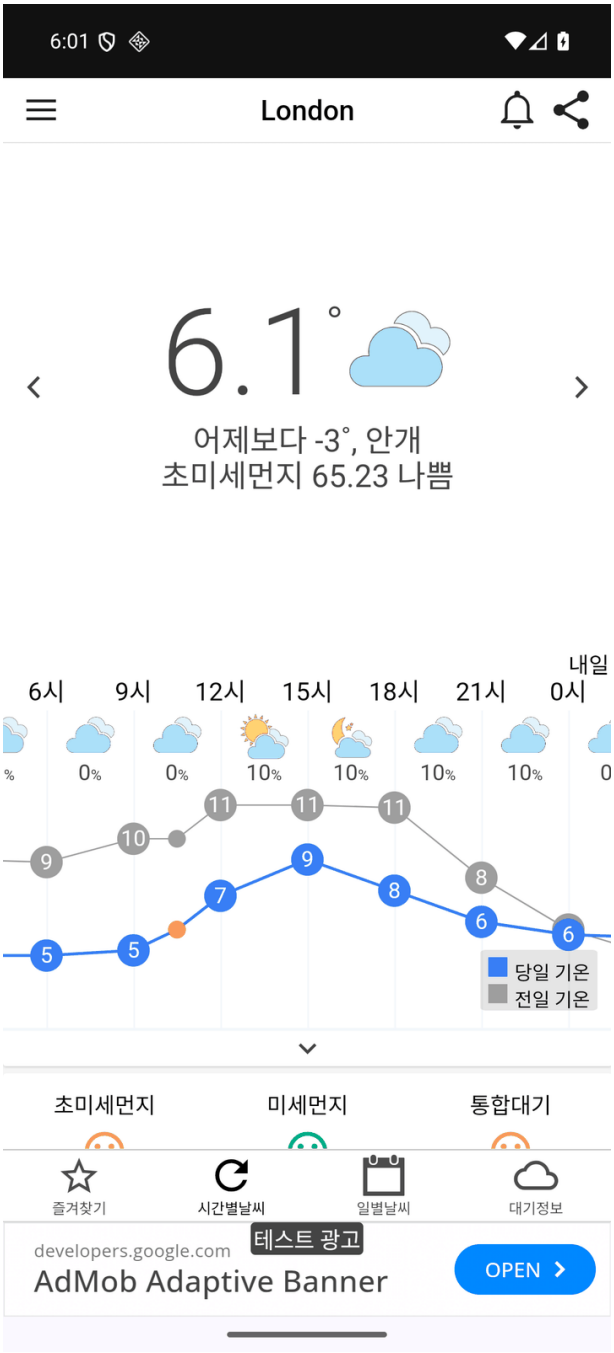

Expected result: The weather of the next place appears. Swiping inside the chart scrolls the chart instead.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

17. Add a place abroad

Search an overseas city by its usual name, for example London, and tap the result. Overseas places use the same screens.

London after adding it (S03).

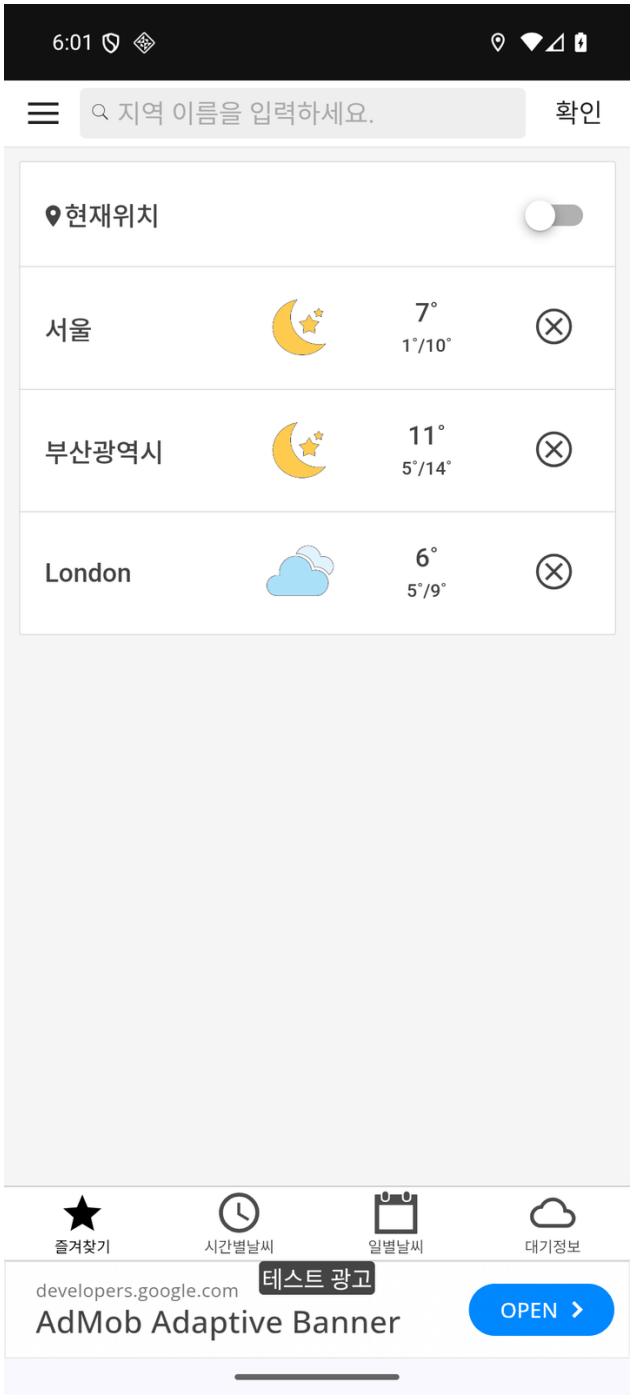

Expected result: The place appears in Favorites like a Korean place. If its weather cannot be retrieved, the app shows a message; try again later.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

18. Edit or delete places

In Favorites, tap 편집 (Edit). Switch 현재위치 (Current location) on or off, or tap ⊗ to delete a place. Tap 확인 (Done) to finish.

Edit mode with the current-location switch and delete buttons (S02).

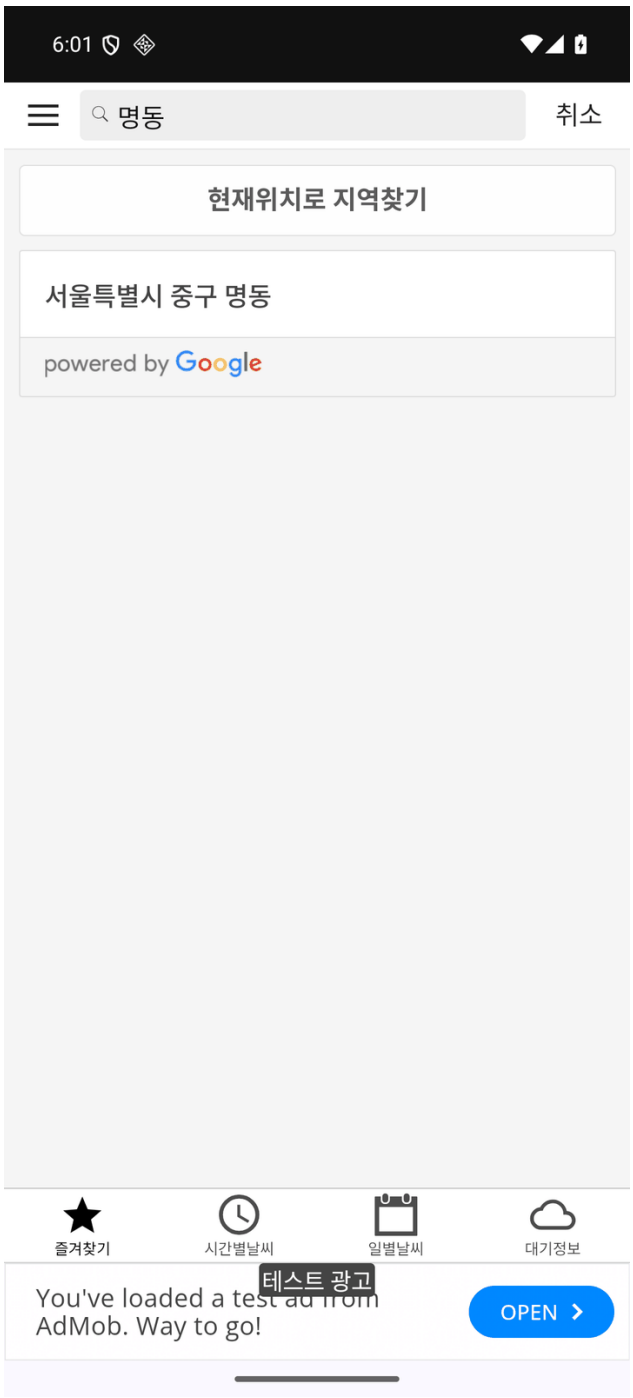

Expected result: Deleted places disappear from the list.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

19. Find the place you are in

Tap the search box, then 현재위치로 지역찾기 (Find by current location). The app looks up your position and lists the area. Tap it.

The current position found: 서울특별시 중구 명동 (S02).

Expected result: The area is added and its weather opens.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

20. Weather at your position

The place found from your position works like any other saved place.

Weather for 명동, the emulator's position (S03).

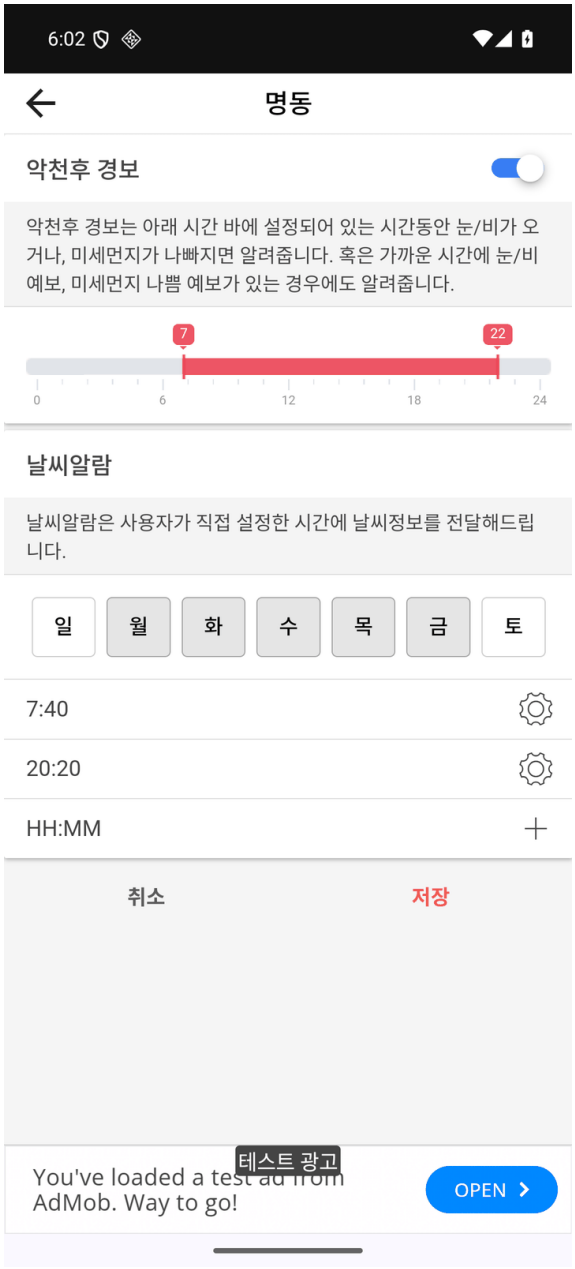

Expected result: The title shows the area you are in.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

21. Set notifications for a place

Tap the bell on the weather screen or in Favorites. 악천후 경보 (Severe weather alert) tells you when rain, snow or bad fine dust occurs within the hours on the bar, or when they are forecast soon. 날씨알람 (Weather alarm) sends the weather at your times on the selected days.

Notification settings for 명동 (S09).

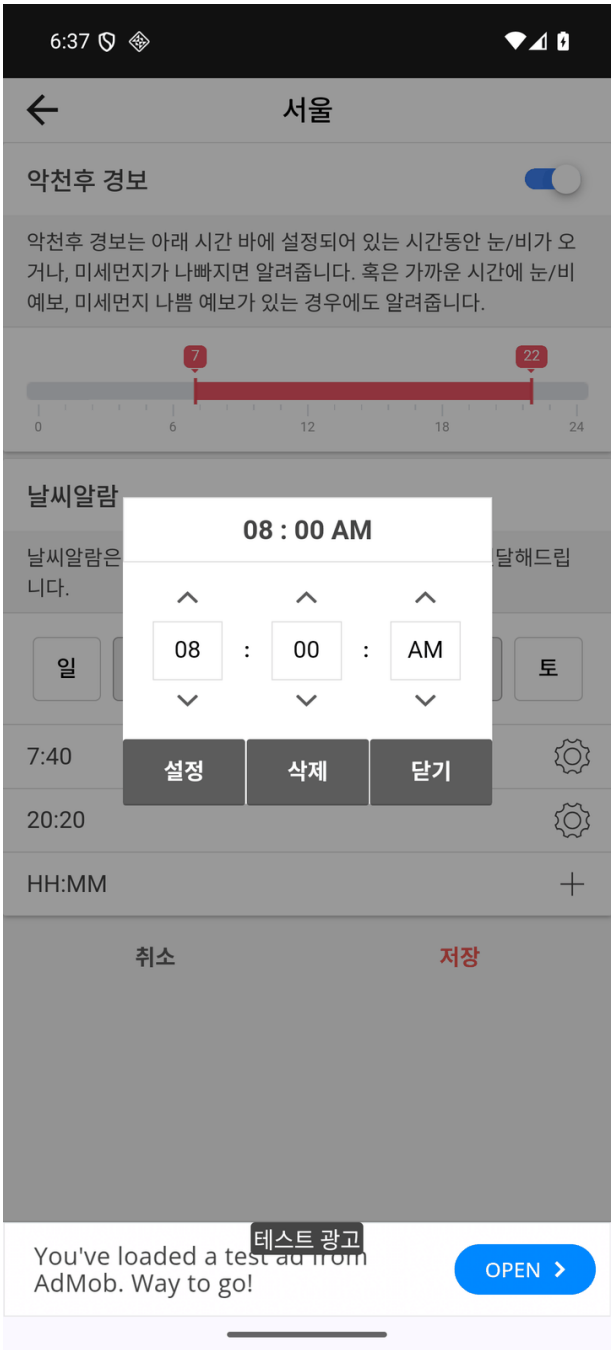

Expected result: The next two steps set a time and save. If notifications are off for the app, a dialog titled Permission says 알림이 꺼져있습니다. 이 앱에 대한 알림을 허용해주세요. (Notifications are off; allow them for this app) (O11).

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

22. Set an alarm time

Tap a time to change it, or HH:MM with + to add one (up to five). Set the hour, minute and AM/PM with the arrows. 설정 (Set) applies the time, 삭제 (Delete) removes that alarm and 닫기 (Close) leaves it unchanged. Midnight (12:00 AM) cannot be set: the app treats it like 삭제.

Time picker for a new alarm (O14).

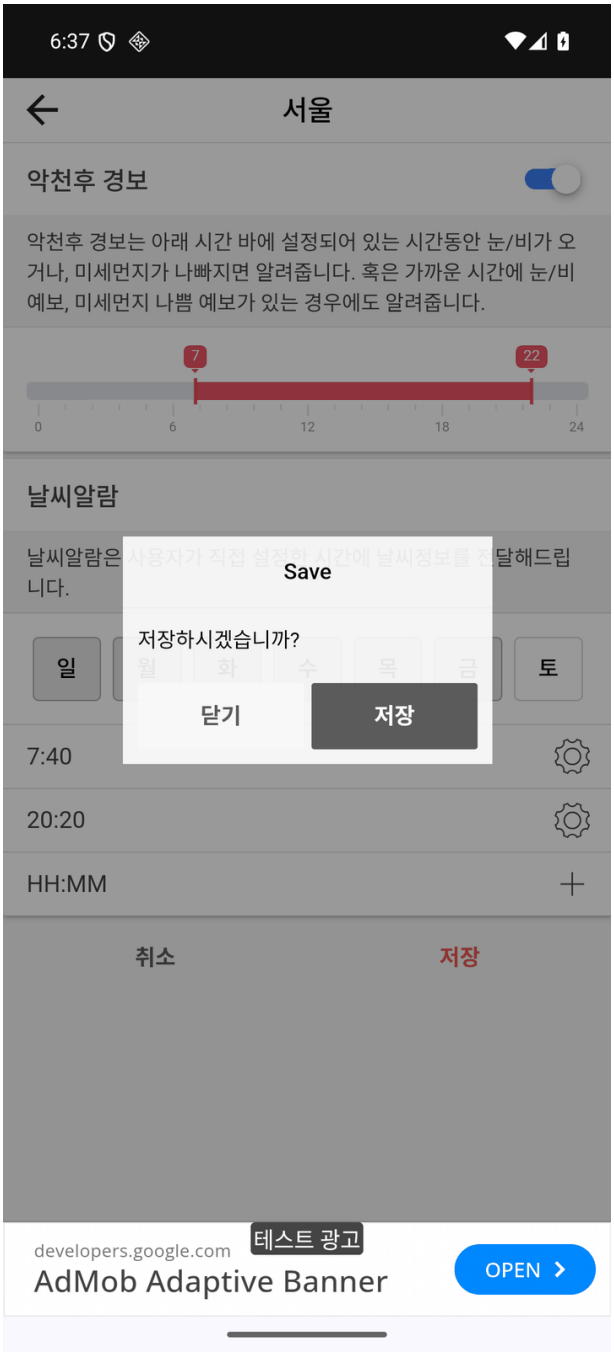

Expected result: The list shows the time; it is kept after you save.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

23. Save your changes

Tap 저장 (Save) at the bottom. If you leave with the back arrow or 취소 (Cancel) after a change, the app asks 저장하시겠습니까? (Save changes?): 저장 saves and 닫기 (Close) discards.

Save confirmation after a change (O12).

Expected result: If the alert bar starts and ends at the same hour, saving is refused with 시작시간과 종료시간을 같은 시간으로 할 수 없습니다. (O13).

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

24. Open the menu

Tap the menu button ☰ at the top left. The menu lists 기상특보 (Warnings), 전국날씨 (Nationwide weather), 전국미세먼지 (Nationwide air), 널스쿨 풍향 (wind map website), settings, privacy choices, 의견보내기 (Feedback) and 응원리뷰쓰기 (Rate this app).

The side menu (S06).

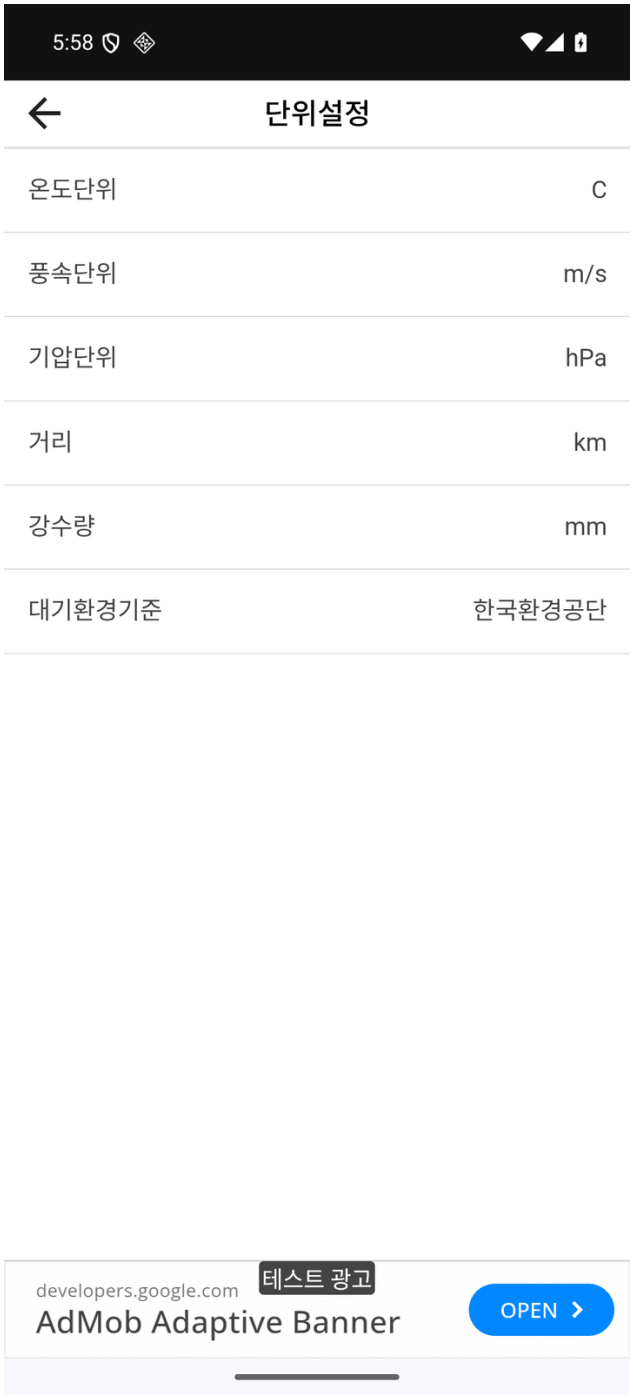

Expected result: Tap an item to open it; tap ← to close the menu.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

25. Change units

Tap 단위설정 (Units). Each row sets a unit: temperature, wind speed, pressure, distance, precipitation and the air-quality standard (대기환경기준).

Units: C, m/s, hPa, km, mm and the Korea Environment Corporation standard (S07).

Expected result: Each row opens its list of choices.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

26. Pick a unit

Tap 온도단위 (Temperature unit) and choose C or F. The check mark shows the current choice.

Temperature unit list with C selected (S08).

Expected result: The choice applies right away.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

27. See the new unit

Go back to the weather screen. Temperatures now use the chosen unit.

Seoul in Fahrenheit: 45° (S03).

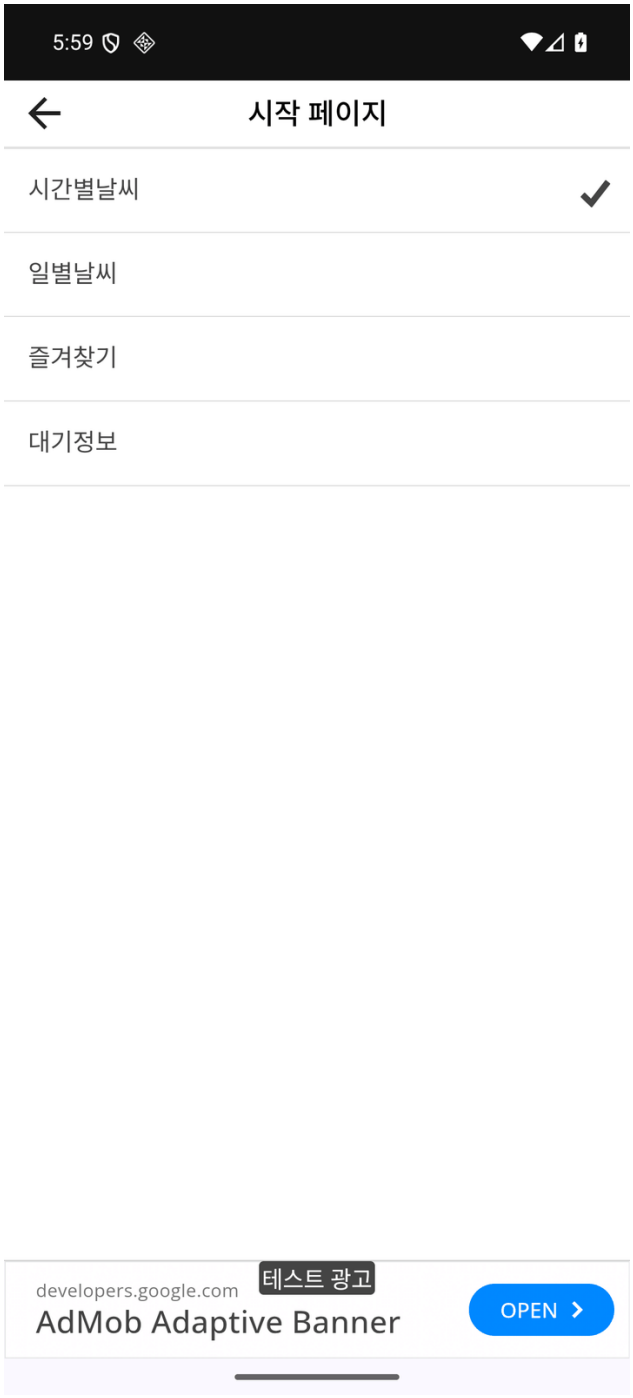

Expected result: The current temperature and the chart values use °F. Choose C again to switch back.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

28. Choose the start screen

In the menu, tap 시작 페이지 (Startup page) and pick the screen the app opens with: 시간별날씨, 일별날씨, 즐겨찾기 or 대기정보.

Startup page options with 시간별날씨 selected (S08).

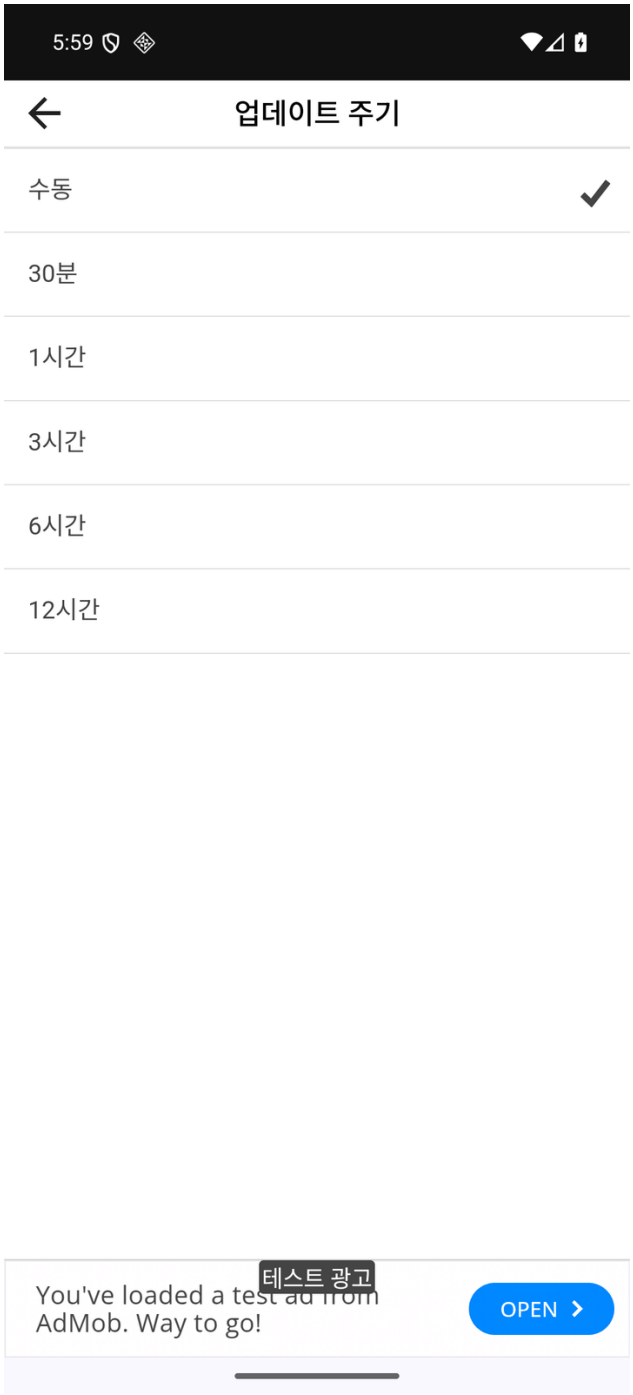

Expected result: The app opens on that screen next time.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

29. Choose the refresh interval

Tap 업데이트 주기 (Refresh interval) and pick 수동 (Manual), 30분, 1시간, 3시간, 6시간 or 12시간.

Refresh interval options with 수동 selected (S08).

Expected result: With 수동, refresh by tapping the selected tab. With an interval, the app reloads the weather after that time while it is open.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

30. Change the theme

Tap 테마 설정 (Theme) and choose 밝은 테마 (Light), 어두운 테마 (Dark), 날씨 사진 테마 (Weather photo) or 이전 테마 (Old).

어두운 테마 (Dark theme) on the hourly screen (S03; chosen in S08).

Expected result: The weather screens use the new colors.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

31. Weather photo theme

날씨 사진 테마 shows a photo that matches the current sky behind the temperature.

Weather photo theme for a clear night (S03; chosen in S08).

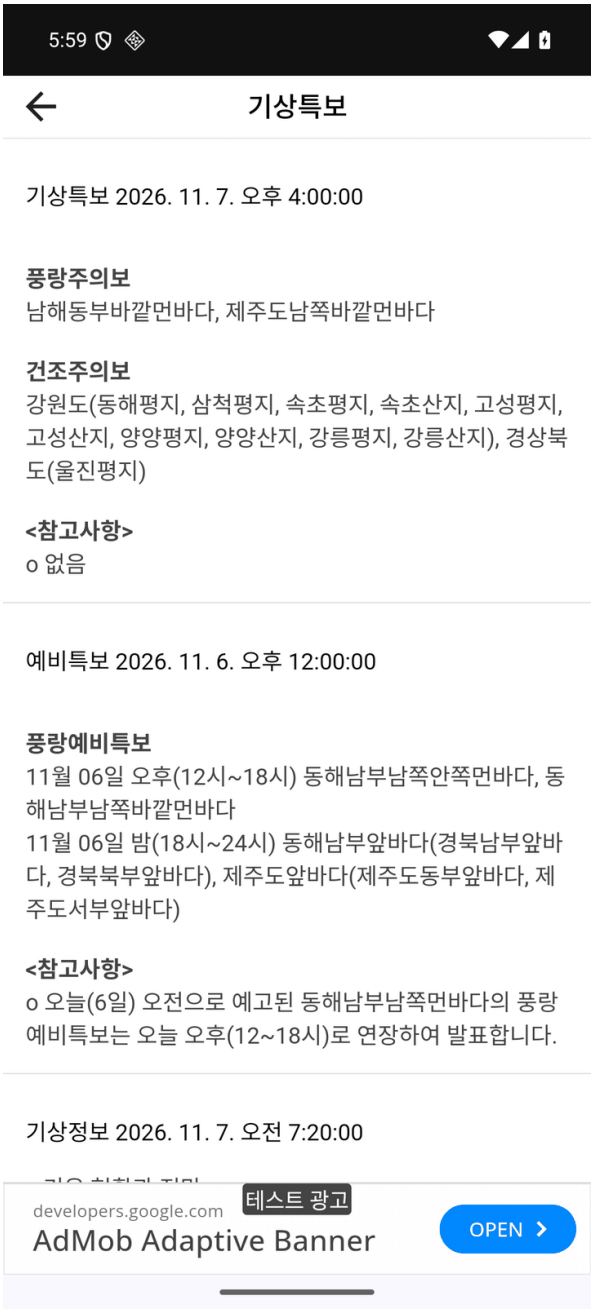

Expected result: The photo follows the current weather.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

32. Read weather warnings

In the menu, tap 기상특보 (Weather warnings). The page shows current warnings (기상특보), preliminary warnings (예비특보) and weather information (기상정보) from the Korea Meteorological Administration, each with its time.

기상특보 issued at 16:00 on 7 November; 예비특보 and 기상정보 below carry their own times (S12).

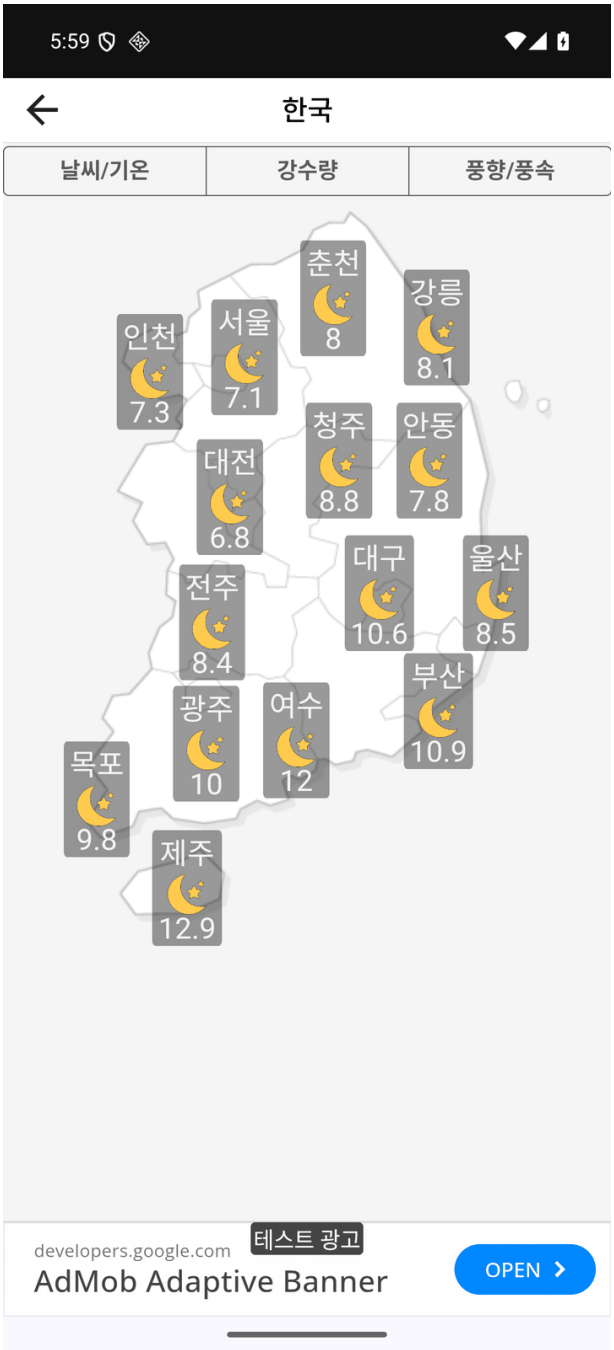

Expected result: You see which regions have warnings. This item appears when the app's region is Korea.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

33. Nationwide weather

In the menu, tap 전국날씨 (Nationwide weather). A map shows the sky and temperature of major cities. The tabs switch between 날씨/기온 (Weather/Temperature), 강수량 (Precipitation) and 풍향/풍속 (Wind).

Nationwide weather map (S10).

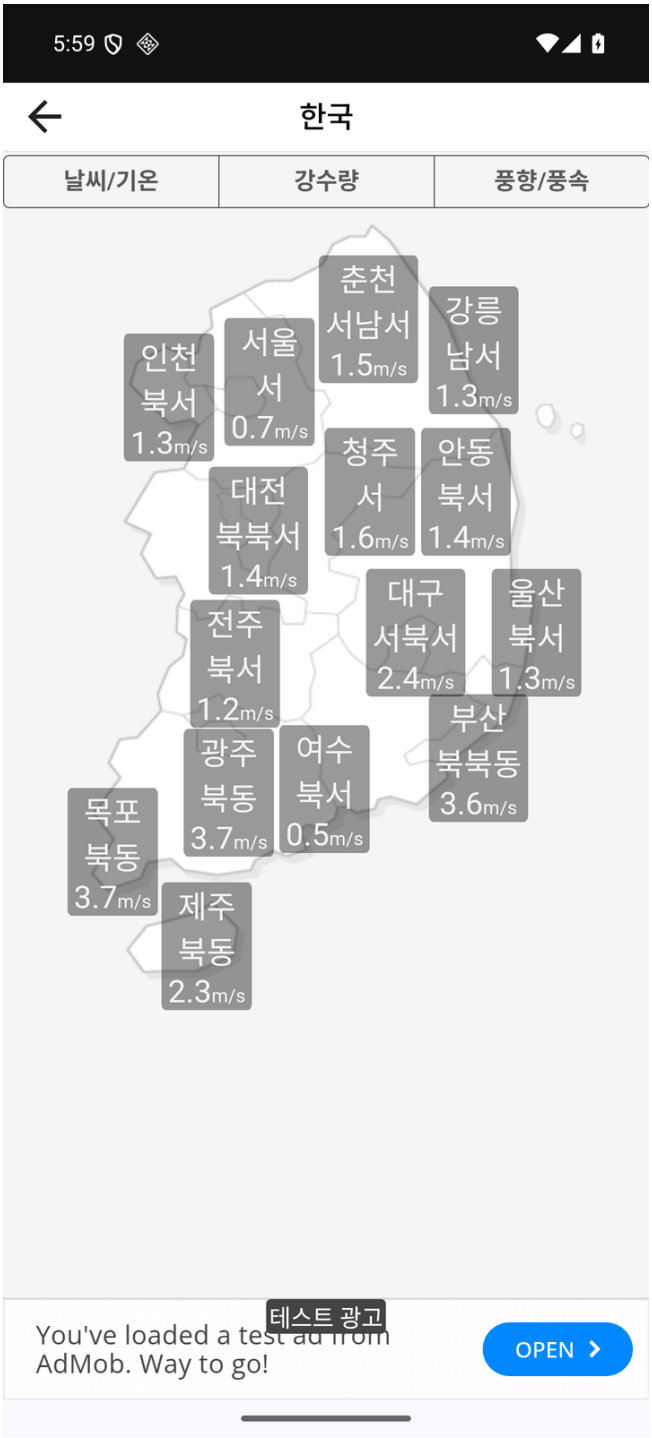

Expected result: The map changes with the selected tab.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

34. Nationwide wind

The 풍향/풍속 tab shows the wind direction and speed for each city.

Wind directions and speeds in m/s (S10).

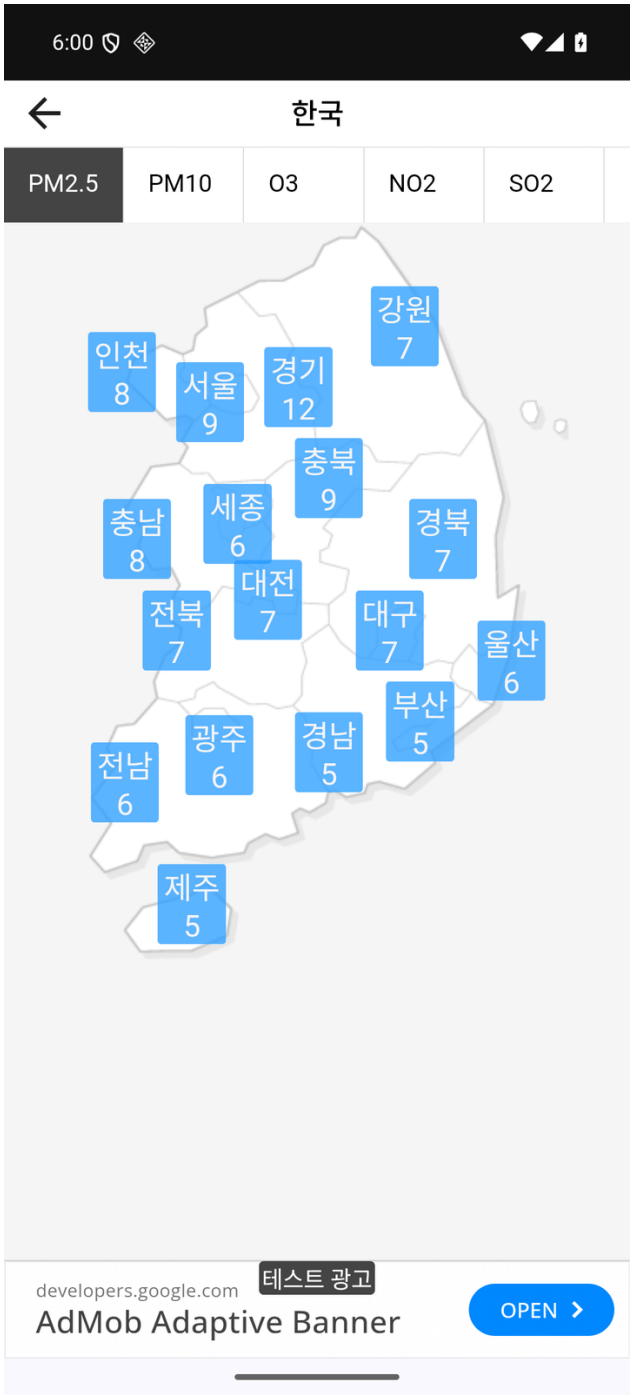

Expected result: Each city shows its wind.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

35. Nationwide air

In the menu, tap 전국미세먼지 (Nationwide air). The tabs switch between PM2.5, PM10, O3, NO2, SO2 and CO; swipe the tab row to reach CO.

PM2.5 by region (S11).

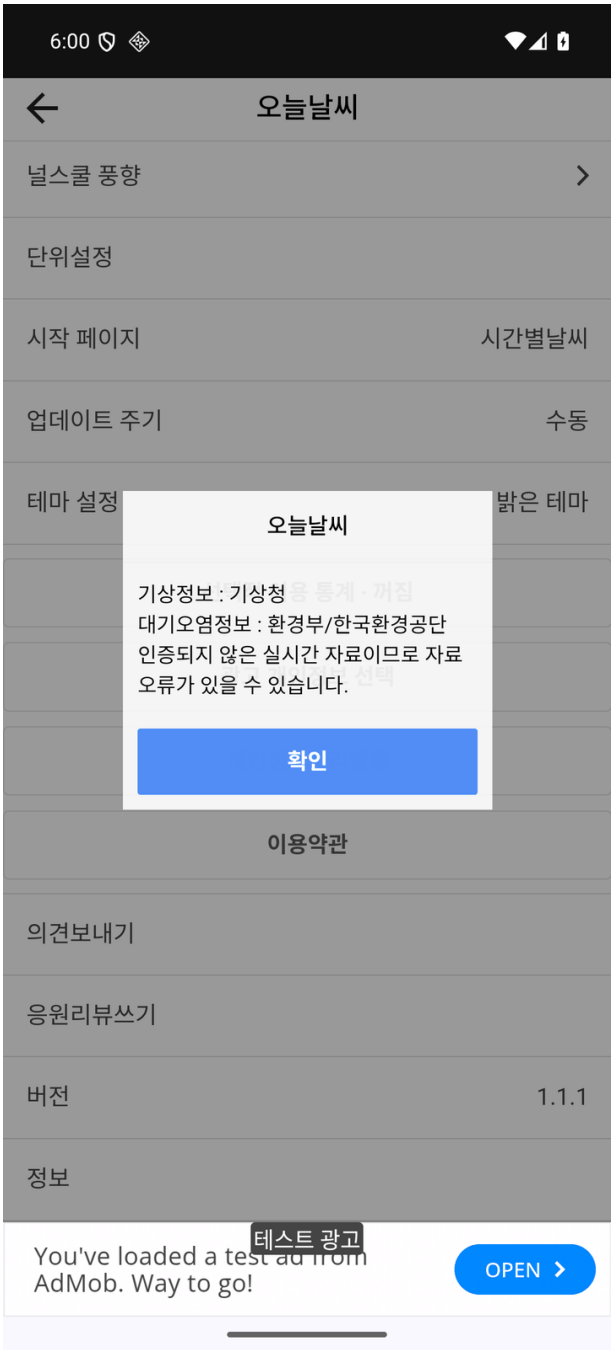

Expected result: Each region shows its value for the selected pollutant.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

36. Data sources and version

At the bottom of the menu, 버전 (Version) shows the app version. Tap 정보 (About) to see the data sources: weather from the Korea Meteorological Administration (기상청), air quality from the Ministry of Environment and the Korea Environment Corporation.

About: data sources and the note that real-time data is unverified and may contain errors (O10).

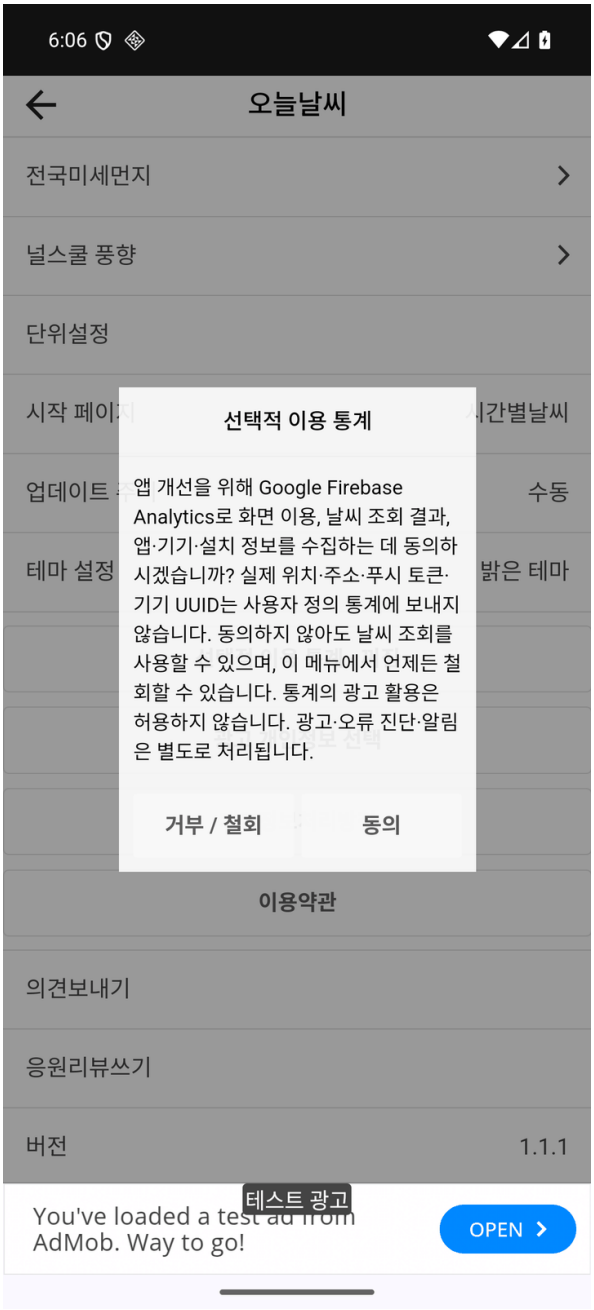

Expected result: Tap 확인 (OK) to close the notice.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

37. Usage analytics and privacy

In the menu, tap 선택적 이용 통계 (Optional usage analytics). Tap 동의 (Agree) to allow analytics or 거부/철회 (Decline/Withdraw) to refuse; it stays off until you agree. 광고 개인정보 선택 (Ad privacy choices) opens Google's ad privacy form where one applies, or says it cannot open; on the Korean test device nothing appeared. 개인정보처리방침 and 이용약관 open the privacy policy and terms.

The usage analytics dialog over the menu (S06).

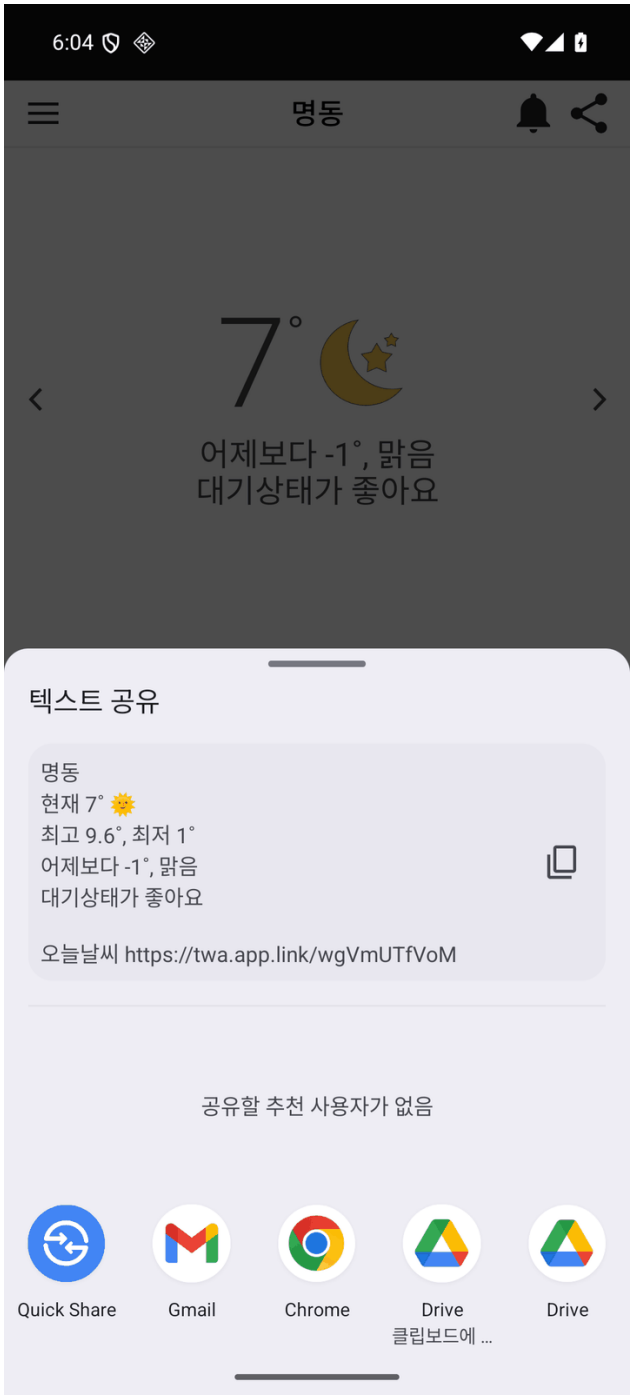

Expected result: The menu row shows the current choice (꺼짐 means Off). Weather works either way.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

38. Share the weather

Tap the share icon at the top right. Android's share sheet offers apps to send a text summary of the place, temperatures and the comparison with yesterday, with a link.

Android share sheet with the weather summary (O16).

Expected result: The chosen app receives the text.

TodayWeather for Android: user manual (app 1.1.1)

TodayWeather 1.1.1 on Android with Korean screens. Korean labels are followed by their English meaning. Weather values are live examples captured on 7 November 2026.

39. Exit the app

On a main tab, press Android's Back button. The app asks 종료하시겠습니까? (Do you want to exit?). Tap 확인 (OK) to exit or 취소 (Cancel) to stay.

Exit confirmation (O15).

Expected result: The app closes only after 확인.
